## Transfer Agreement between Montana Tech and FVCC for Students Transferring into Mechanical Engineering at Montana Tech

## Summary

This agreement is valid for Flathead Valley Community College (FVCC) and Montana Tech.
This transfer agreement lists the courses, which transfer to Montana Tech from FVCC and indicates, which courses will fulfill specific curriculum requirements. Courses not listed on this agreement may transfer, but will not be used towards the Mechanical Engineering degree. The agreement has two main sections:

1. Courses that may be used to fulfil general education requirements (Humanities \& Fine Arts, Social Science Core)
2. Courses that are equivalent to specific Montana Tech Mechanical Engineering Curriculum (Block Transfer and Core Class Transfer)

## Montana Tech Mechanical Engineering Curriculum and General Education Requirements

Per the Montana University System requirements, all students seeking an Associate of Science or Baccalaureate Degree, will take 30-31 credits of general education core. The following requirements are described below:

- Communications

## Associate of Science (AS) Degree at FVCC

If students follow the above plan, they will be required to take 1 additional 3 credit course to fulfil the FVCC general education core. FVCC has 3 credits, of Math compared to 6 credits at Montana Tech, and requires 3 credits of Global Issues (G). The global issues three credits are additional to the requirements for degree at Montana Tech, but fulfill the AS degree requirements. The following is taken from the FVCC catalog for the AS degree.

The Associate of Science (AS) degree is a general transfer degree. This degree indicates that the student has completed a course of study equivalent to the first two years of a bachelor degree. This degree does not officially include a major or minor course of study.

With an Associate of Science degree from FVCC, a student can transfer to any Montana University System school with junior class status and be guaranteed that the lower division general education core requirements have been completed for the transfer school.

To receive the AS degree, the following requirements must be met:
I. Completion of 60 semester credits in courses numbered 100 level and above. A course cannot satisfy more than one general education core or graduation requirement.
II. Completion of the General Education Core Curriculum* (30 credits).
III. Completion of Additional Degree Requirements: six semester credits of Mathematics (M) and/or Natural Science ( NL or N or L ).
IV. Final cumulative grade point average of 2.0 or above. A grade of "C-" or better is required for all courses other than electives unless otherwise stated.
V. At least 20 semester credits earned at FVCC and the final 10 credits earned at FVCC.
VI. A limit of 15 semester credits graded " $S$ " may count toward the Associate degree. Check with transfer institution regarding the acceptance of " S " credits.
*Refer to the General Education Core Curriculum for a list of courses meeting these requirements.

The following graduation checklist will be used for those students at FVCC that are seeking to transfer to Montana Tech, but want to complete a AS degree at FVCC and then transfer. The recommended courses are filled in to help the student decide on the courses that would help them in an engineering degree.
