

FUNDAMENTALS AND APPLICATIONS OF FIRE ASSAY - SHORT COURSE

**Confirmed Dates:
Saturday to Wednesday,
August 17-21, 2024**

26th Fire Assay Short Course

Hosted by

**Dr. Courtney Young
Metallurgical & Materials
Engineering Department
Montana Tech, Butte, MT**

This is a comprehensive short-course designed to provide fundamental, laboratory and industrial training in Fire Assay. It is valuable to both technical and nontechnical personnel. A wide variety of topics are thoroughly covered:

- History & Methodology
- Sampling Theory & Instrumentation
- Challenges & Applications
- Chemistry & Calculations
- Thermodynamic Evaluations
- Supportive Analytical Methods
- Industrial Tours of Milling, Smelting and Refining Operations as well as Labs
- Applications to Au, Ag and PGMs

An elective Hands-on Lab is offered but is not sponsored by Montana Tech. Demand though is expected to be high with limited space so act fast!
